

How Do I Sign Up for Smart Hub?

The process is very simple. In just a few easy steps, you can create an account and will then have the ability to review and evaluate your energy use. This technology will be a great assistance in helping you understand your energy consumption. Let's get started!

1. Have a copy of your electric bill for the account number
2. Click here on the Smart Hub Icon
3. Follow the steps creating log-in name and password. If you already have an e-bill account setup with us, you can use the same log-in.

Congratulations, you now have complete access to view your energy use at anytime you choose. You no longer have to wait until next month's bill to view your energy consumption.
